

The powergorilla will give you an extra 2-5 hours of power, depending on your laptop's specification, and over 20 hours on various other electronic devices. Powergorilla will work with devices up to 24volts - so from your laptop, right the way down to your mobile phone or iPod! Just select which voltage you require; 5V, 16V, 19V or 24V and the LCD screen will indicate which setting has been chosen. Then simply hook up your gadget and away you go! You can even daisy-chain, so whilst the powergorilla is charging your laptop, you can charge the powergorilla from the mains power supply. Or you can charge your laptop and your mobile phone simultaneously!

220 MM * 130 MM * 15 MM

1. go to www.powergorilla.eu/arflash/
2. allow flash to access your webcam (Mac users open flash settings, click webcam icon, select USB webcam)
3. hold this page with this area facing the webcam - the Powergorilla will appear in 3D scale 1:1 to the A4
4. go to www.holland-xl.com to learn more about this cool laptop charger and other great portable products
5. share this website & PDF with your friends. Maybe they want to audition for King Kong as well!

Contact info@katana-xl.com to learn more about the commercial application of augmented technology
